JAY Adjustable Solid Seat - E2231

JAY® Adjustable Solid Seat

The JAY Adjustable Solid Seat is made of ABS Plastic and includes a solid seat with non-skid surface in the center of the seat and hardware for mounting on the wheelchair. 1 1/2" thick. The overall length of the seat may measure up to 1" shorter on each side than the seat sling will measure.

Lip Kit

The Lip Kit is used to locate the cushion on the solid seat to help keep the cushion in place. The kit can be retro fitted on a solid seat or you can order it with the Solid Seat. If you retro fit the Lip Kit you will be required to drill two 7/32" holes in the front and rear of the solid seat. If you purchase the JAY Solid Seat with the Lip Kit we will build it onto the JAY Solid Seat.
